EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Karri Bradley (Reg. No. 56,300) on May 13, 2008.

In the claims:

Claim 3 (amended) A method of producing increased drought tolerance in a plant, said method comprising:

a) introducing into plant cells a plant transformation vector comprising a heterologous constitutive promoter operatively linked to a nucleotide sequence that encodes a DRO2 polypeptide comprising an amino acid sequence having at least 95% sequence identity to the amino acid sequence of SEQ ID NO:2 to produce transformed cells overexpressing the DRO2 polypeptide, wherein overexpression of the DRO2 polypeptide [is involved with] confers drought tolerance to said plant cells;

b) growing the transformed cells to produce a transgenic plant[, wherein said heterologous constitutive promoter provides overexpression of a DRO2 transcript,] and

c) identifying said transgenic plant with increased drought tolerance by measuring relative water content of [said] the transgenic plant in comparison to an untransformed plant, whereby the drought tolerant transgenic plant has a higher water content than said untransformed plant.

Claim 18 (amended) The method of claim 3, further comprising subjecting the plant to water deprivation prior to identifying said transgenic plant with increased drought tolerance [by measuring relative water content of said transgenic plant].

Applicant authorized amendment to claims 3 and 18 to obviate potential issues under 35 U.S.C. 112, 1st and 2nd paragraphs.

Conclusions

2. Claims 3 and 17-19 are allowed.
